SELECTED CASTES, BY DISTRICTS

This table was extracted at the request of the local government, and at their expense. The selection was made on the following basis:—

- (i) All scheduled castes (including Hindu members of 16 tribes) were included.
 - (ii) All other castes were included which have at any time been considered for inclusion in the schedule.
 - (iii) Such other castes were included as, according to the census of 1931, were found to have strength of not less than 4 per 1,000. In addition there is one caste, which nearly reaches this minimum, namely the Baruis.
 - (iv) Agarwallas, Baidyas and Rajputs have also been extracted, although they fulfil none of the previous conditions, on account of their social importance. Agarwallas do not include Jais.
2. The figures exhibited in this table in all probability do not represent the true strength for any caste. This is because about one quarter of the total number of Hindus failed to return any particulars from which it would be possible to deduce what caste they belonged to.
3. At the request and at the expense of the Durbar of Tripura State, a number of castes which are found in that state have been extracted. The selection of these castes was made by the Durbar. For some of these castes the figures give a total which is probably less than their real strength; for in this state also, a number of Hindus, about one-eighth of the whole, failed to return any caste.
4. Of the sixteen tribes included in this table, 14 figures in the list of scheduled castes. The figures for tribes comprise only those persons who profess Hinduism.
5. Not all castes are represented in every district and some are so restricted in location that to save printing space their figures are assembled below:—

NOTE

The census enumeration was carried out in full according to plan but the Government of India decided to restrict the tabulation for British India. Consequently the tables in this volume cover less than half the contemplated range and offer in effect only the distribution of the population by community and by province or state, district, tehsil and town. In many areas however village tables will also be produced by provincial Governments.

Opportunity has been taken however to sort wherever possible the 1/50 random sample taken in every area.

2. The slips in which the remaining unsorted information is to be found are stored in each province against a possible reopening of tabulation in happier circumstances.

NOTES

The census enumeration was carried out in full according to plan but the Government of India decided to restrict the tabulation for British India. Consequently the tables in this volume cover less than half the contemplated range and offer in effect only the distribution of the population by community and by province or State, district, tehsil and town. In many areas however village tables will also be produced by provincial governments.

Opportunity has been taken however to sort wherever possible the 1/50 random sample taken in every area.

SAMPLE TABLE

--	----

I—AREA, HOUSES AND POPULATION

1. The all-India Census questionnaire of 1941 was applied to the whole of Baluchistan, thus recording for the first time in history the age and civil condition of each and every indigenous inhabitant. For political and sentimental reasons these two items were never asked in previous censuses. The only tracts which could not be enumerated on account of administrative and political difficulties, and of which the estimated population was taken into account, were the following border areas:—

District	Tehsil	Name of tract	Houses	Estimated population			Remarks
				P	M	F	
Zhob	Fort Sandeman	Gastoi	150	747	430	317	Based on the actuals of 1921
		Kamar din Kaniz	254	1,376	747	629	Based on the house-list estimates made in 1910
		Total	404	2,123	1,177	946	

2. The area of the province has undergone the following changes owing to either the revision of survey figures, or the formation of a new tehsil of Usta in the Sibi District, or the inclusion of certain disputed areas and in one or two cases owing to new surveys:—

District or State								Area in sq miles	
								1931	1941
BALUCHISTAN	134,638	134,002
Quetta-Pishin	5,220	5,310
Loralai	7,525	7,375
Zhob	10,315	10,178
Bolan	359	407
Chagai	19,622	19,429
Sibi	11,187	11,457
Kalat State	54,713	53,995
Kharan State	18,565	18,508
Las Bela State	7,132	7,013

3. The only changes which took place in the areas of districts and States on account of territorial transfers were: (1) the transfer of the Shorapur sub-tehsil with an area of 414 sq miles from the Chagai district to the Quetta-Pishin district, and (2) the formation of the Kharan division of the Kalat State into a separate State.

4. The urban : rural ratio calculated on the population living in towns of 5,000 and over is 102 : 1,000 ; that is, for every thousand of rural population there are 102 persons living in towns.

5. " House " covers only occupied houses and includes not only permanent houses but also blanket-tents and other removable or temporary dwellings. The figures for 1941 are exclusive of houses in the strictly military areas of the various cantonments and also those in military stations temporarily established on account of the Anglo-German War.

6. Statistics of area and population by tehsils will be found in Provincial Table I.

7. The definition of " village " is given on the fly-leaf of Table III.

II—VARIATION IN POPULATION SINCE 1901

Census results for 1891, 1901, 1911, 1921, 1931 and 1941 may be summarised thus :—

Year					Population

Tehsil of the Zhob District

The first census of 1891 was too rough and fragmentary to lend itself for comparison in this table. Similarly comparison with the figures for 1901 is misleading because Western Sinjrani in Chagai as well as Makran and Kharan were excluded from the census and the figures for the Jhalawan division of the Kalat State which were based on estimates were found to be very considerably exaggerated.

The figures of population for previous censuses differ in the case of Quetta-Pishin and Chagai districts from those given in this table in previous reports owing to subsequent inter-district territorial transfers specified on the fly-leaf of Imperial Table I. The adjustments thus made are shown below :—

III—TOWNS AND VILLAGES CLASSIFIED BY POPULATION

1. The term "village" is the revenue village including attached hamlets. In States' areas it includes not only revenue *mauzas* with attached hamlets, but also residential villages with outlying hamlets as well as localities which though often containing practically no dwellings are regularly occupied at certain seasons of the year by the semi-nomadic population.

"Town" means any continuous collection of houses possessing definite urban characteristics and usually not below 5,000 in population although, in one or two cases for particular reasons this population limit is not applied.

2. The following unclassified population is included in the figures given in column 18 of the table owing to there being no village within reasonable distance in which the figures could be included :—

District or State :				Road-side gangs and coolies camps	Railway gang-huts	Mine coolies	Nomads (seasonal immigrants)	Total
BALUCHISTAN	649	1,730	356	12,151	14,886
Quetta-Pishin	140	..	389	529
Loralai	4,892	4,892
Zhob	186	356	103	645
Bolan	96	558	654
Chagai	306	695	1,001
Sibi	247	151	..	4,989	5,387
Kalat State (Kachhi)	1,778	1,778

3. For the purposes of this table the floating population is shown separately from the population gathered under columns 5, 7, 9, etc. This element, however, is included in town populations for the purposes of Imperial Tables IV and V and hence slight differences in total.

SAMPLE TABLE VII

This census has been the only one of its kind in the world, and was taken out during the main survey. On the 1st of July 1951, on this occasion but opportunity has been taken to make a special survey of 1/50th of Belokhinat rural population in the district of Belokhinat. There has been no attempt to give a general survey of the population of the district; in their case the only figure would be the total population of the district.

2. The community table gives the number of Christians and Hindus as 24 and 14 respectively. The average number of children per woman is 1.7 for the main survey and 1.8 for the special survey. According to the sample 1.2% of the population are 10 years and over per 1,000 of total rural population are 925 and 935.
